Subject: Notice in Accordance with TSCA Section 8(e): Results of an acute oral screening study with three substituted, nitrogen-containing heterocycles

Dear Section 8(e) Coordinator:

[REDACTED] is submitting results of an acute [REDACTED]  
[REDACTED], Substance 2 [REDACTED], and Substance 3 [REDACTED]  
conducted by [REDACTED]. The test substances are experimental pesticides.

The study was performed to assess the acute toxicity following oral administration in Wistar rats.

Single doses of 50 mg/kg body weight of test-item preparations in 1% CMC-solution in drinking water were given to fasted female Wistar rats each by gavage.

The following table shows lethality at the offered dose level:

Test item	Dose level (mg/kg body weight)	Animals tested	Lethality
Substance 1	50	3	3
Substance 2	50	3	2
Substance 3	50	3	3

Under the condition of the above-mentioned study the median lethal dose of the test items after single oral administration is less than 50 mg/kg body weight in Wistar rats.
